Product attributes:

Type of stencil: Mask is Mandatory / 2 parts (500*500mm), Mask is Mandatory / 2 parts (820*820mm), Distance (500*500 mm), Distance (820*820mm), Directional arrow (800*600mm), Wait Here (800*600mm)

Product features:

Product Type: Line marking spray

Product Type: Complements

Brand: SOPPEC

Product short description:

The stencils for social distancing are ideal for limiting contact and indicating the guideline to adopt in the fight against Covid-19.

Product description:

USE OUR NEW STENCILS FOR SOCIAL DISTANCING MARKING

Work in compliance with governments' regulations

Technima developed new floor marking stencils in the aim to fight against the spread of the Covid-19 pandemic. This range has been created to respect the social distancing's rules in facilities and outdoors.

Easy to use, these stencils will help you to mark your entrance, pathways and aisles. In compliance with Health & Safety at Work recommendation, you will be able to use clear and contrasting symbols adapted to the area and to the size of the pathway.

Manage traffic flow

As it is important to define a pathway, segregate the traffic, indicate the flow and remind the need to wear a mask, Technima developed different types of social distancing stencils. Re-usable, they allow you to set-up professional marking on any type of surfaces.

Made of durable 0,4mm polyester, they come in two-pieces for a plain color background, or as a one-piece for a sign with no background.

Our different stencils for social distancing

FOR APPLICATION

Our MERCALIN Striper, Striper Pro and SOPPEC Tracing and Tracing Plus paints are the most professional and effective way to set-up lines and symbols on the floor.

See the MERCALIN Striper range

To ease the application of the paint and have a better final finish, SOPPEC also offers a marking paint gun handle.

SEE THE SOPPEC TRACING RANGE

To ease the paint application and get a better result, we recommend you to use our Hand-held Applicator.

Instruction for use

For a marking paint in aerosol use

- Unroll the stencil onto the surface to be painted
- We recommend to use tape to secure the stencil
- You can place weights on the stencil to prevent it from raising up with the breath
- Spray with MERCALIN or SOPPEC line marking paints

For a brush or roll use

- We recommend to fix the stencil with tape
- Start painting from the edges towards the centre of the stencil

For a two-pieces stencil

- Fix the circle stencil on the floor with tape
- Spray the marking paint inside the circle stencil
- Remove the stencil
- After drying time, position the second part of the stencil on the painted circle to paint the pattern above

Storage after use

- Remove excess paint with a cloth
- Lay the stencil flat for at least 3 days in a dry place before storing it
