- Relative density (20°C g/ml): 0.842

Health and safety

CLP labelling with one pictogram.

DANGER

H222 Extremely flammable aerosol.

H229 Pressurised container: May burst if heated.

Instructions of use of the Spray wax

Shake thoroughly before using the Spray wax. Keep it in a frost-free place. Apply a thin coat of Wax polish, then spread evenly and polish using a clean damp cloth, preferable a cotton sponge or a non-woven nylon towel, until you have achieved the desired result. A polishing machine can be used if necessary. Clean/rinse the entire surface with water and dry using a lintfree cotton cloth or soft paper. As a precaution, we strongly recommend carrying out a test of our spray wax on an unobtrusive area before using.
